Dear Recruiter,

With 12 years of experience in full-stack web development and systems architecture, I am confident and I will be an excellent fit for big company next Senior Software Engineer. My experience has provided me with innovative and technical skills necessary to successfully provide your company with multifaceted technical solutions across a wide range software platforms. Also my faculty department was formed by bringing together two areas of academic knowledge, Programming and Business, obtained during my undergraduate education. I think, I will find so creative solutions for your company.

At New Enterprise, I am responsible for leading the development for three high-traffic e-commerce, Crm/Erp websites that offer minimum 1.5 million monthly users customizable documents. I oversee the building of innovative systems architecture via Entity and Telerik/DevExtreme frameworks, HTML5, ASP.NET MVC, CSS3/SASS, Javascript/JQuery/React/Angular, SQL, MySQL and ElasticSearch. I have all kinds of information about developing Microsoft Visual Studio .NET applications (WPF, Silverlight, ASP.NET MVC, .NET CORE, WCF, C #, C ++) and developing web applications.

I was instrumental in structuring several internal systems comprising order entry/management tools, conversion/revenue reporting, and production workflow tracking, as well as designed custom REST APIs built in Python, WebSockets, and NodeJS. I also successfully collaborate on solutions with our product, CRM/ERP and marketing teams to offer the best user experience to build higher customer lifetime value. Now, I'm working in Republic of Turkey Ministry of Health. And, I'm developing code about the expertise training tracking system.

I provided real-time communication between HTML pages and any Java or .NET application without using without Python. The hospital is used in the implementation and functioning of the automated ISO certified and I know that there are five major hospitals in Turkey.

I worked in organizations such as System Design, software development, etc., and I have accomplished tasks that are prone to team work within various projects. (Nokia Siemens Networks-Web Project, Turkish Ministry of Health Orthopedic Project, XDS Messaging System and Document Management System), Turkish Ministry of Health Expertise Doctor Tracking System, Shell Petrol SAAS system, Turkish Education

Association CRM System. I have the knowledge of human relationships, customer relations and public relations.

I have refined my strengths through 9 years of experience in DevOps and where I provided solutions in database technology, programming, operating systems. The following is a snapshot of my broader technical skills:

- Agile Project Management
- Custom Web and Mobile Applications
- Database Programming
- Data Science
- Networking Devices and Tools

Additionally, I have extensive experience with microservices architecture, including CQRS (Command Query Responsibility Segregation) and event sourcing. At PepsiCo, where I served as an architect, I developed a loyalty mobile app called Kazandırrio, which has a user base of 12 million. This project, in the FMCG sector, involved complex event sourcing techniques to ensure scalability and performance.

It would be a pleasure to learn more about big company needs, and I would welcome the chance to provide further insight into my knowledge of project management, technical abilities, personal attributes, and track record of success in building revenue generating web technologies compatible across multiple platforms, browsers, and devices.

Thank you for considering my candidacy for this position. I hope to hear from you soon to schedule and interview.

Sincerely,

Aykut AKTAŞ
